

MULTIVITAMINO LAMONS

*Generando vida y creciendo sanos!!
La sanidad animal bajo un nuevo concepto.*

Con la utilización de MULTIVITAMINO LAMONS aseguramos el aporte de nutrientes esenciales y la estimulación del sistema inmunológico, fundamentales para la fertilidad y el crecimiento de los animales.

COMPOSICION

Multivitamino Lamons contiene aminoácidos esenciales, vitaminas liposolubles e hidrosolubles y minerales, fundamentales para el correcto desarrollo de las funciones biológicas del organismo animal.

BENEFICIOS GENERADOS

- ✗ Protección frente a infecciones bacterianas y víricas.
- ✗ Fortalecimiento tras el parto e incremento en la producción láctica.
- ✗ Mejor índice de conversión y de crecimiento en animales jóvenes.
- ✗ Descenso en el porcentaje de retrasados y colas.
- ✗ Menor mortalidad.
- ✗ Mejor rendimiento económico de la explotación.

DOSIFICACIÓN

En general se administrará a razón de 0,5 g/litro de agua de bebida o leche durante 3 a 7 días.

También puede administrarse espolvoreado sobre la comida o empajado sobre la paja que debe consumir el animal, a razón de:

- Vacas: 10 a 20 g/animal
- Terneros: 1 a 5 g/animal
- Ovejas y cabras: 1 a 2 g/animal
- Corderos: 0,5 a 1 g/animal
- Cerdas: 5 a 10 g/animal
- Lechones: 1 a 2 g/animal
- Cerdos de cebo: 1 a 5 g/animal
- Caballos: 10 a 20 g/animal

MULTIVITAMINO LAMONS

Promoting life, growing with strong!!

Bioactive and natural ingredients for the animal to perform at its maximum growth potential.
Promoting health care under a new concept.

INGREDIENTES

Multivitamino Lamons is a full dietary nutritional supplement that contain all fundamental aminoacides and a full vitaminic intake, including liposoluble and hydrosoluble vitamins.

The Multivitamino Lamons is a supportive source of:

- Essential aminoacides.
- Liposoluble vitamins: Retinol palmitate as vitamin A, Cholecalciferol as vitamin D₃, Alpha-tocopherol acetate as vitamin E and Menadione as Vitamin K₃.
- Hydrosoluble vitamins: Vitamin B complex and Ascorbic acid (vitamin C).
- Trace minerals as Calcium, Phosphorous, Sodium, Potassium and Magnesium.

PROPERTIES

The Multivitamino Lamons provides full-spectrum nutrition which takes the guesswork out of properly supplementing the diet. This concept of totality helps the body to unleash its natural energies, adding to the health and vitality of daily living.

One of the most dangerous practices in health is the concept of fragmented nutrition. This occurs when we take one or two isolated nutrients in lieu of the others. Vitamins and minerals were designed to work in concert with each other and the frequent practice of fragmented nutrition often creates more deficiencies than it prevents.

USE

MULTIVITAMINO LAMONS ... the natural feed supplement

The Multivitamino Lamons is used as supportive source of essential aminoacides, liposoluble vitamins and Hydrosoluble vitamins. The supportive source is required in case of stress conditions, improper feeding or poor conditions particularly after parturition, in lactating period or in disease estates and their convalescence.

PRESENTATIONS

1 Kg and 25 Kg (other presentations are optional).

MULTIVITAMINO LAMONS

Promoting life, growing with strong!!

Bioactive and natural ingredients for the animal to perform at its maximum growth potential.

Promoting health care under a new concept.

FEEDING RATE

All species: 0,5 g/litre of drinking water or milk for 3-7 days. (The feeding rates can be increased by 50% to counteract stress - e.g. due to illness, calving etc.)

- Equivalent aproximatly to:
- Lactating cows: 10 to 20 g/animal
 - Veals: 1 to 5 g/animal
 - Ewes and goats: 1 to 2 g/animal
 - Sheep: 0,5 to 1 g/animal
 - Lactating Sows: 5 to 10 g/animal
 - Sucking pigs: 1 to 2 g/animal
 - Growing pig: 1 to 5 g/animal
 - Horses and camels: 10 to 20 ml/animal
 - Foals: 5 to 10 ml/animal

ADVANTAGES

The high demands of today's intensive farming on farm animals - e.g. dairy cows - require highest quality food. Grass, hay and silage do not always contain the necessary amount of aminoacides and vitamins which farm animals need.

We offer our own brand - a 100% natural product. *Multivitamin Lamons* contains naturally an unequalled, balanced range of essential aminoacides and vitamins. These elements are particularly beneficial for avians species, also for dairy cows and calves, for sheep and lambs, for goats, deer and horses. They help to:

- ✦ support the animals digestive system and help to utilise food more efficiently
- ✦ improve fertility and regularity of calving/lambing
- ✦ achieve higher milk yields with more protein
- ✦ reduce incidence of retained cleansing
- ✦ reduce scour
- ✦ builds up the body's defences and reinforces its natural immunity
- ✦ prevents virus and bacterial infections
- ✦ helps to control effectively pathological processes.

It can be beneficial for several health problems, including acute stress and infections, essential for attrition control during lactating and first age periods.
